5 UNITED STATES DISTRICT COURT  
6 WESTERN DISTRICT OF WASHINGTON  
7 AT SEATTLE

8 UNITED STATES OF AMERICA, *et al.*, ) CASE NO. C70-9213 RSM  
9 Plaintiffs, ) Subproceeding No. 09-01  
10 v. ) ORDER DENYING MOTIONS FOR  
11 STATE OF WASHINGTON, *et al.*, ) RECONSIDERATION  
12 Defendants. )  
13 \_\_\_\_\_ )

14 On March 19 and 20, 2018, the Quileute Indian Tribe, Hoh Indian Tribe, Quinault Indian  
15 Nation, and Suquamish Indian Tribe filed Motions for Reconsideration asking the Court to  
16 reconsider its prior Order regarding boundaries of the Quinault and Quileute U&As. Dkts. #442,  
17 #444, #445 and #448. These Tribes essentially argue that the western U&A boundaries  
18 established by this Court fail to account for Quileute and Quinault whaling and sealing voyages  
19 in directions other than due west from the coast. Dkts. #442 at 3-4 and #445 at 3. Accordingly,  
20 these Tribes ask the Court to reissue its Order and adopt boundaries based on “radial lines  
21 representing multidirectional” voyages. Dkts. #442 at 6-7 and #445 at 6-7. At the Court’s  
22 direction, the Makah Indian Tribe and the State of Washington provided responses to those  
23 Motions. Dkts. #452, #453 and #456. The Court now DENIES the Motions for Reconsideration.  
24  
25

26 “Motions for reconsideration are disfavored.” LCR 7(h). “The court will ordinarily deny  
27 such motions in the absence of a showing of manifest error in the prior ruling or a showing of  
28

1 new facts or legal authority which could not have been brought to its attention earlier with  
2 reasonable diligence.” LCR 7(h)(1). In this case, the Court is not persuaded that it should  
3 reconsider its prior Order.

4 On July 9, 2015, the Court entered lengthy Findings of Fact and Conclusions of Law,  
5 determining that the western boundary of the Quinault Indian Nation’s usual and accustomed  
6 fishing ground in the Pacific Ocean is 30 miles from shore, that the western boundary of the  
7 Quileute Tribe’s usual and accustomed fishing ground in the Pacific Ocean is 40 miles offshore,  
8 and the northern boundary of the Quileute Tribe’s usual and accustomed fishing ground is a line  
9 drawn westerly from Cape Alava. Dkt. #369. However, the Court also noted that it had not  
10 received evidence at trial specifying the longitudes associated with the U&A boundaries  
11 determined therein. Accordingly, in order to delineate the boundaries with certainty, the Court  
12 directed the parties and interested parties to brief the precise longitudinal coordinates associated  
13 with the boundaries set forth herein. *Id.* In response, Quileute and Quinault advocated for  
14 western U&A boundaries drawn as straight lines, from north to south, regardless of the distance  
15 from shore as these lines diverged from the actual coastline. Dkts. # 372–#375. The Makah  
16 proposed slanting lines approximating the shoreline at the travel distances adjudicated by this  
17 Court. Dkt. # 377. The State generally concurred with the Makah, but proposed a boundary that  
18 tracked the shoreline. Dkt. # 381. In Reply, the Quileute and Quinault defended their initial  
19 boundaries, but proposed an alternative western boundary charted as “waypoints” based upon a  
20 “radius” approach. Dkt. # 388 at 8-10. The Court ultimately adopted the longitudinal and  
21 latitudinal boundaries proposed by the Quileute, Quinault and Hoh. Dkt. #394.

22 This matter was then appealed to the Ninth Circuit Court of Appeals. Dkts. #396 and  
23 #398. While the Court of Appeals affirmed in large part this Court’s determinations, it reversed  
24

1 this Court with respect to its determination of the Quileute's and Quinault's U&A boundaries.

2 Dkt. #435. The Court of Appeals stated:

3 The parties agreed as to the northern boundaries but "dispute how the parties  
4 believe the Western boundary for the Quileute and Quinault should be  
5 demarcated as the line proceeds south." The court decided to use longitudinal  
6 lines because it had done so in a prior proceeding with respect to the Makah's  
7 boundaries. The court started at the northernmost point of the Quileute's  
8 U&A, drew a line 40 miles west, and used that longitudinal position as the  
9 western boundary for the entire area. The court did the same with 30 miles  
10 for the Quinault. The map below depicts the final result.

11 [graphic omitted]

12 The Makah takes issue with the court's use of a straight vertical line because  
13 the coastline trends eastward as one moves south. The Makah calculates the  
14 coast-to-longitude distance at the southernmost point as 56 miles for the  
15 Quileute and 41 miles for the Quinault. In other words, the Quileute's and  
16 Quinault's southernmost boundaries respectively extend 16 miles and 11  
17 miles beyond the court's finding of usual and accustomed fishing, and their  
18 total areas respectively sweep in an extra 413 square miles (16.9% of the total  
19 2,228 miles). The result would be different, for example, had the boundary  
20 lines been drawn parallel to the coastline.

21 These significant disparities underscore the deficiencies in the court's  
22 longitudinal boundaries. . . .

23 . . .

24 Accordingly, we reverse the district court's order imposing longitudinal  
25 boundaries. Because the law does not dictate any particular approach or  
26 remedy that the court should institute, we leave it to the court on remand to  
27 draw boundaries that are fair and consistent with the court's findings.

28 Dkt. #435 at 23-27.

29 After remand, this Court reviewed its Findings of Fact and Conclusions of Law and  
30 Memorandum Order (Dkt. #369), along with its Amended Order Regarding the Boundaries of  
31 Quinault and Quileute U&As (Dkt. #394), and numerous other documents (Dkts. #372-#383 and  
32 #388), and determined that the State of Washington's method of determining the boundaries at  
33 issue are most consistent with this Court's determinations regarding boundaries in this matter,

1 and addresses the Court of Appeals' concerns with the Court's prior conclusions. *See* Dkts. #381  
2 at 3-4 and #435 at 23-27. On March 5, 2018, the Court issued a new Order adopting the State of  
3 Washington's proposed boundaries. Dkt. #439.<sup>1</sup>

4 On the instant motions for reconsideration, the Quileute Indian Tribe, Hoh Indian Tribe,  
5 Quinault Indian Nation, and Suquamish Indian Tribe essentially reiterate prior "radius"  
6 arguments made to the Court in its initial briefing regarding boundaries. Thus, the Tribes fail to  
7 present new facts or legal authority which could not have been brought to its attention earlier  
8 with reasonable diligence.

9  
10 Moreover, those Tribes fail to demonstrate manifest legal error. For the reasons stated  
11 by the Makah, the approach advocated by the Quileute is not based upon appropriate record  
12 evidence. *See* Dkt. #453 at 2-10.

13  
14 Finally, the Quinault argue for the first time on reconsideration that the boundary should  
15 not be tied to the geographic shoreline because the shoreline is constantly shifting. Dkt. #445 at  
16 3-4. The Tribe provides no explanation why this argument could not have been previously  
17 brought to the Court's attention earlier with reasonable diligence.

18  
19 Thus, the Court agrees with the State of Washington that it's new Order has fulfilled the  
20 Ninth Circuit's instruction to adopt a boundary reflecting determinations made by this Court and  
21 the evidence presented by the parties at trial.

22 For all of these reasons, the Court finds that the Quileute Indian Tribe, Hoh Indian Tribe,  
23 Quinault Indian Nation, and Suquamish Indian Tribe have failed to meet the applicable standard  
24 for motions for reconsideration and the Court DENIES the motions (Dkts. #442, #444, #445 and  
25 #448).  
26  
27

28  

---

<sup>1</sup> The Order was subsequently amended to correct a scrivener's error. Dkt. #449.

DATED this 16 day of April 2018.

A handwritten signature in black ink, appearing to read 'R. Martinez', written over a horizontal line.

RICARDO S. MARTINEZ  
CHIEF UNITED STATES DISTRICT JUDGE
